

Signet: Risk and Compliance Assessments for GenAI applications.

Ensure Your AI solution is Safe, Robust and Compliant

As GenAI adoption accelerates companies face growing risks related to bias, safety, scalability and regulatory compliance. Signet provides expert-crafted AI risk assessments to help businesses identify vulnerabilities, improve AI integrity, and maintain compliance with evolving industry regulations.

What is Signet?

- 1.** Signet is a comprehensive assessment service for AI applications built on GenAI technology. Using over two hundred potential assessment points we delve into your application, GenAI outputs from our customer-specific prompts, your company processes and the full user/customer flow through product exploration and staff interviews..
- 2.** From these explorations our team can then provide you with your assessment report. Depending on the package that you subscribe to, you can have access to recommendations and action plans for improvement, certification, training and even continuous monitoring going forwards.
- 3.** We analyze AI outputs over fifteen specific categories to improve your application performance, user trust and satisfaction and reduce ensure compliance with the specific AI regulations and frameworks relevant to your business.

Why choose Signet?

- **Proven AI Risk Expertise** – Deep evaluation of LLM behavior, bias detection, and ethical AI best practices.
- **Regulatory Compliance** – Ensure alignment with GDPR, AI Act, SOC2, HIPAA, FCA, and other critical frameworks.
- **Actionable Insights** – Receive a structured risk analysis, scoring system, and improvement roadmap.
- **Certification & Trust** – Gain Signet's AI safety, bias, or robustness certification to build confidence with customers and stakeholders.
- **Scalable Solutions** – From startups to enterprises, our services adapt to your AI governance needs.

Assessment Packages

Foundation Assessment

Essential bias & safety evaluation for startups & small businesses.

Advanced Assessment

In-depth risk analysis, compliance validation & adversarial testing.
